You can predict random numbers generated by a computer either by running the function and going back in time or by using basic math and programming. Computers cannot generate truly random numbers because they are deterministic, so algorithms using initial values are created to generate sequences of numbers.

Predicting Random Numbers Generated By Computers - Eightify.app : summary : mathematics-and-science : predicting-random-n...

Random number generators or RNGS are hardware devices or software programs which take non-deterministic inputs in the form of physical measurements of temperature or phase noise or clock signals etc and generate unpredictable numbers as its output.

Understanding random number generators, and their limitations, in ...
