If the square harbors a mine, the player l

oses. If instead a number (from 1 to 8) appears on the square, it specifies how

many mines are present in the eight squares surrounding the numbered square. It

#39;s clear, for example, that finding a square numbered 8 means that all eight

adjacent squares contain mines.

To win a round of Minesweeper, you must

click on t

he board every square that doesn't have a mine under it.

Once y

ou've done so, the game will be over. If you accidentally click a square tha

t has a mine beneath it, the game will be over. You'll have the option of st

arting a new game or redoing the one you just played.
