Potential profit = stake x (od) Tj T* BT /F1 1

s (180) by 100 to give you 1.8. You then multiply 1.8 by your stake (30), which gives you a potential profit ofR\$54. Remember, in addition to your profit, a winning bet also returns your stake.

Guide to Calculating Betting Odds - betJACK : latest : guide-to-calculating-betting-odds

There are arguably two mathematical concepts that are most often used in gambling. These are the concepts of expected value and probability theory
