<p&gt;Palmeiras&lt;/p&gt; <p&gt;Santos&lt;/p&gt; <p&gt;S&#227;o Paulo&lt;/p&gt; <p&gt;Corinthians&lt;/p&gt; <p&gt;Chamas&lt;/p&gt; <p&gt;&lt;/p&gt;&lt;p&gt;To fully exploit the constrained width, avoid loadin g the neighbouring structures and straddle shared utilities running under the si te, the 💳 house was constructed using a lightweight steel frame on a pi led slab. The steelwork was prefabricated as a series of 💳 portal frame s that were craned down the alley and site-welded together. Given that every inc h in such a narrow space 💳 was valuable we chose to fully weld the conn ections and express the frame internally, even utilising the depth of the &#1281 79; steels to maximise the space.</p&gt; <p&gt;Alongside the painted steel a simple palette of spruce plywood, douglas fir joists, terrazzo and cork 💳 flooring enriches the interior. Extern ally the timber framed walls are clad in handmade pewter glazed brick slips with a patina 💳 that reflects the changing light of the sky. Both the simpl y landscaped and planted rear courtyard and the garden in 💳 front of the e house enhance the feeling of space in this small dwelling.</p&gt; <p&gt;This self-build project had a long gestation, fitted &#128179; in arou nd professional and family life. The design and construction were developed as t ime and money allowed so whilst planning 💳 consent was given in January 2014 and the ground works commenced in the spring of 2024, the building was not 💳 completed until August 2024. We worked closely with friend and joine r Michael Tye to lead a small team of local 💳 subcontractors and employ ed specialist fabricators for certain key packages as well as undertaking a fair amount of the work ourselves.</p&gt; <p&gt;The &#128179; result is a unique and highly crafted home that is a tes tament to the commitment, effort and support of many 💳 people. By repla cing a narrow disused alley with this comfortable small home we hope to have enh anced the streetscape we 💳 inhabit. As the building completes the terra ce, so does the front garden - with the simple bin store, planting, level &#1281 79; access and bike parking we aimed to keep it open and reinforce the pavement line without making a hard boundary. 💳 The development highlights the viability, both economically and spatially of small brownfield sites to provide high quality sustainable development at 💳 a time of housing shortage. W e see it as a model for other seemingly undevelopable urban gap sites where the 💳 value added is through the quality of the architecture rather than ov er-development.</p&gt;
