

jogo gold mine slots

</div>

On its first couple of moves, the computer will typically put its first O in the center space (as usual) and its second O in the lower middle space once you place two Xs in diagonal corners. Therefore, spend this turn

placing your X in the top middle space to block the computer's win

In the 1970s MIT students built an unbeatable tic tac toe computer out of tinkertoys.

No. It's called impossible for a reason. The closest you can get to beating it is a draw, it's programmed to be impossible.</div></div></div>
