The Aviator game is one of the online casino games that has become very popular in Brazil. It consists of a virtual plane that rises and disappears from the screen, and the objective is to withdraw the bets before it happens. The game is played in real time and the result is determined by a random number generator. Therefore, it is a game purely of chance.

It is important to understand that it is not possible to predict the result of the Aviator game. Although some people may think that it is possible to predict the Aviator game, the truth is that the game is completely based on chance. It is evident that the random number generator is impossible to predict the result with precision. However, there are some strategies that can help increase the chances in the game:
