Look for the secure padlock icon in the address bar. Chrome, Safari, Internet Explorer and Firefox browsers display a padlock in the URL field to indicate "safe" websites. You can click on the padlock to confirm that the certificate belongs to the same company as the website you are trying to visit.

How to identify legitimate websites | Columbia University Information Systems

legit-websites.cuit.columbia.edu

How to check if a website is legitimate

1. Study the address bar and URL.

2. Investigate the SSL certificate.

3. Check the website for poor grammar or spelling.

4. Verify the domain.

5. Check the contact page.
