

O O bet365

to iOS to be hosted in its App Store. This change was due to the fact that many apps were packaged as container apps, as they essentially repackaged their websites into apps, which was easier for developers to maintain. Requirements incompatible. But if you are keen to install APK on iPhone, you can go for either of the options: use jailbreaking

If you are an Android user, you have to enable the unknown sources option to open and install apps from APK files. You have to open "Settings" on your Android and go to "Security." There, click on the "allow unknown sources" option and check the box to warn you if the APK file is harmful.
