Ringworm, also known as tinea, is a fungal infection that can affect various parts of the body such as the scalp, body, feet, and nails. It is characterized by red, itchy, and scaly patches on the skin.  
Clotrimazole works by killing the fungus that causes ringworm. It is available in various forms, including creams, lotions, and solutions. When using clotrimazole for ringworm, it is important to follow the instructions carefully and apply it to the affected area regularly for the recommended period of time.  
If you suspect that you have ringworm, it is important to consult a healthcare professional for an accurate diagnosis and treatment plan. They can help determine the underlying cause of your symptoms and recommend the most effective course of treatment.  
In summary, clotrimazole can be a good option for treating ringworm, but it is not a one-size-fits-all solution. It is important to consult a healthcare professional for an accurate diagnosis and treatment plan.

No mundial das micose das unhas, dois pacientes apresentaram melhorias significativas após duas semanas de tratamento twice-daily com sertaconazol nitrato 2%. A cura clínica foi alcançada jogar na quina sorte online  
inejogar na quina sorte online ambos os pacientes, sugerindo que o creme de sertaconazol nitrato 2% é uma opção eficaz no tratamento de tinea pedis. Sertaconazol possui atividade antifúngica de amplo espectro contra dermatofitos dos gêneros Trichophyton, Epidermophyton e Microsporum, e leveduras dos gêneros Candida e Cryptococcus. Além disso, sertaconazol é eficaz contra fungos filamentosos oportunistas e bactérias Gram-positivas. Esses achados são particularmente relevantes uma vez que a tinea pedis, uma infecção fúngica que acomete os pés, afeta enormemente
